The following is an examiner's statement of reasons for allowance: The prior art fails to teach as a whole a proxy agent for communicating data components between a first system which supports a first protocol and a second system which supports a second protocol, said first and second protocols being mutually incompatible, the proxy agent comprising a directory for storing said data components; said directory supporting a hierarchical data structure, wherein each data component stored in said directory is associated with a first data component identifier which is compatible with said first protocol, and with a second data component identifier which is compatible with said second protocol, and wherein each stored data component is associated with a respective position in the hierarchical data structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
